### **DETAILED ACTION**

1. This is the fifth office action for serial number 10/045,572. This application contains 26 claims numbered 1, 3-17 and 19-28. Claims 2 and 18 have been canceled by the amendment filed on May 6, 2004.
2. Claims 1, 3-17 and 19-28 are allowed.

### **REASONS FOR ALLOWANCE<sup>3</sup>.**

3. The following is an examiner's statement of reasons for allowance:

Independent claim 1, 6, 13, 17 and 21, each identifies the distinct combination feature. Claims 1 and 17, each identifies "each of the detents including a generally horizontal groove on the front face of the ratchet plate, the detents being aligned parallel to each other"; and claims 6, 13 and 21, each identifies "a plurality of resilient tabs, at least some of the tabs having respective different lengths" in combination with other features which are not found in the art. The closest prior art, Tanner, (DE 10007550) discloses a fastening device to secure the sink in worktop of kitchen, the device has steps or detents (6) but the detents are not parallel to each other. To make the detents of Tanner V-shaped or aligned parallel to each other would be unobvious since such modification would teach away from the invention or would prevent the pawl from holding.
